

Analysis of A/B Test Results

Data Scientist: Matthew Haddock

Agenda

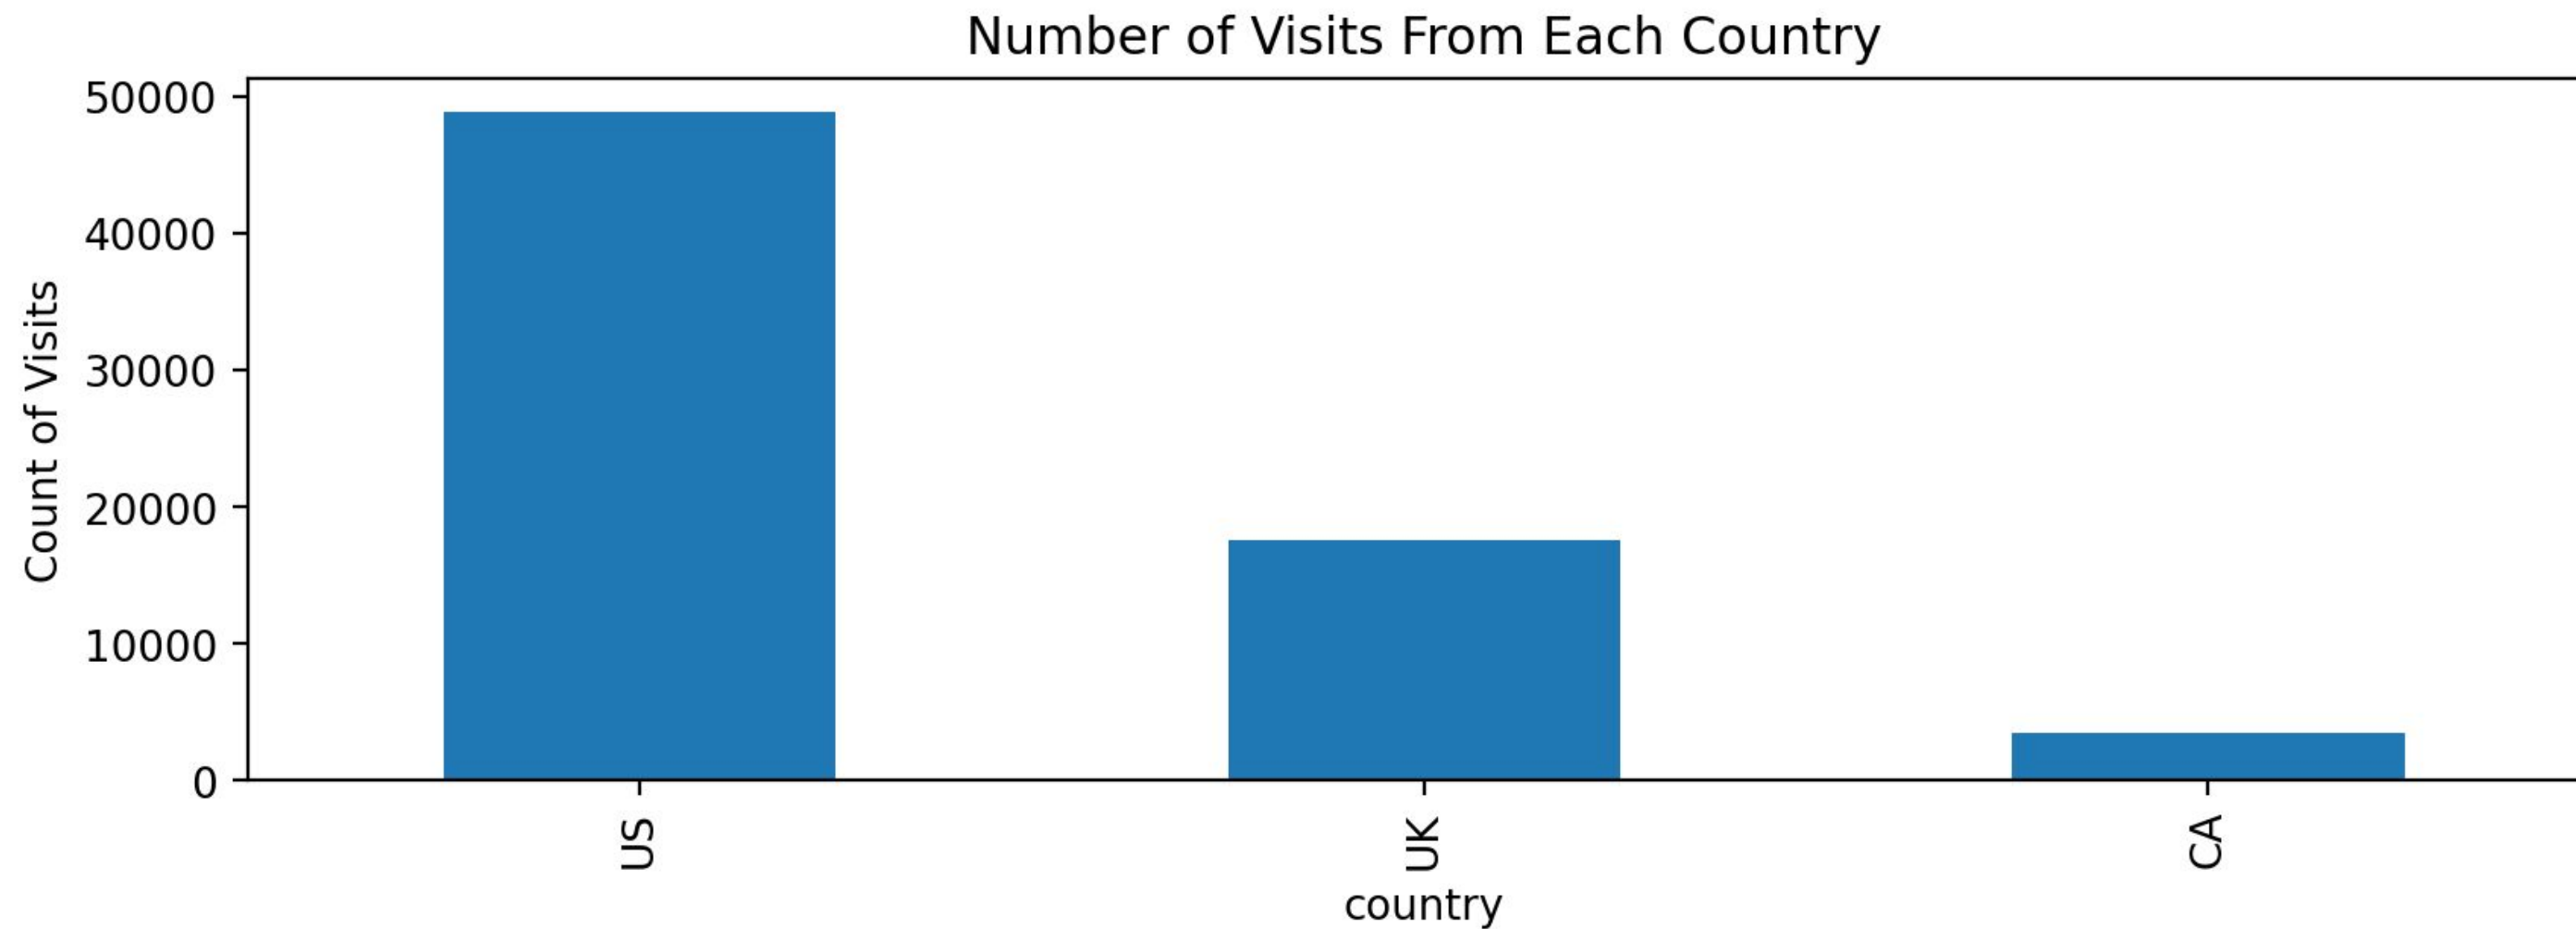

Findings of A/B test analysis

- Experiment Setup
- Conversion Rates
- Experiment Results

How Was the Experiment Implemented?

Total Variant Visitors: **35211**

Total Control Participants: **34678**

Conversion Rates

	U.S.	U.K.	CA
Control	10.7%	10.2%	9.4%
Treatment	15.8%	14.9%	15.4%
Difference	+5.1%	+4.7%	+6.0%

Executive Summary:

- US has higher conversion rates regardless of Control/Treatment
- CA shows the largest increase in Treatment conversion vs Control
- Treatment across all countries shows higher conversion vs Control

Experiment Results

- Treatment Conversion Rate: **15.5%**
- Control Conversion Rate: **10.5%**
- Delta in Treatment vs. Control Conversion Rate: **5.0%**
- p-value: **0.0%**
- Conclusion:
 - The observed data consistently shows the **Control page has lower conversion than Treatment**
 - 0.0% chance the observed data shows the Control page has higher or identical conversion to Treatment
 - The Control page should be rejected and the **Treatment page should be adopted**
